INDIVIDUAL INTRODUCTION

I get a *Bachelor's degree* in Applied Mathematics and Computation from Hanoi University of Science in June, 2013. During studying time, I worked for some companies about networking (CCNA) just for internship for few months.

Then, I moved to University of Science and Technology of Hanoi (USTH) in September, 2013. I hope to get a master degree as soon as possible and get an internship in a lab in France, if I am lucky. I choose Multimedia because I want to get knowledge and learn more about this interesting field. I have some basic skills in programming: Java, C/C++,...and good cornerstone in Mathematics.

I want to focus in Software Engineering, Mathematics, or Image Processing...to get a better job after finishing this master course.

Thank you so much for reading my short introduction !
